Middle East & Africa

Middle East & Africa – Services Overview

Highly Trained Marine Specialists | 24/7 Operations | Global Presence

We provide a wide range of specialized services to optimize the performance and safety of your offshore and marine assets:

Main Engine/Generators Overhauling and Repairs

- Health Check-ups
- 3D Liner Scanning and Measurement Technology
 - Fast, Accurate, and Most Effective
- Scheduled Maintenance (Top Overhaul/Major Overhaul)
- Troubleshooting for Breakdown of Machinery

Spare Parts and Machinery Supply

- Extensive Sourcing Network for Genuine, Second-Hand, and Refurbished Spare Parts and Equipment

Steel & Aluminum - Fabrication, Installation & Repairs

- SPS Overlay - A Specialized Cold Repair Technique Approved by All IACS Members
- Experienced & Specialized Team for Repair/ New Build on Steel and Aluminum Vessels
- Experienced & Specialized Team for Repair/ New Build on All Kinds of Piping Systems

NDT Services

- Z Rope Access Teams for Visual Inspection, UTM Jobs, MPI, LPT, Coating Inspection, Video Relay, and More
- High-Quality UTM Services (Steel Estimation/Repair Plan/Supervision - CAP/CAS/URS Surveys)

Electrical and Instrumentation

- Troubleshooting/Repair of Navcom, FDS, Ballast Water Control Panels, MSBs
- Troubleshooting on Engine Control Instruments and Panels

Manpower Supply

- Highly Skilled, Efficient, and Specialized Manpower for Steel, Aluminum, Hydraulic, and Mechanical Repairs, Fabric Maintenance

CTS Offshore and Marine Ltd is an independent, to serving the energy and materials sectors.

With over 25 years of experience in Oil and Gas, Renewable Energy, and Marine Engineering.

We deliver high-value solutions such as Asset Integrity, Maintenance and Skilled Labour.

A diverse team, we possess in-depth knowledge of local markets and regulations worldwide.

By leveraging our international expertise alongside a profound understanding of local environments, we ensure the seamless integration and successful delivery of engineering projects, providing tangible operational value to our clients.

Our expertise lies in managing challenging, urgent and high-risk projects while minimising downtime.

SPARES SUPPLY

Our Spares and Equipment Division has extensive experience in sourcing high-quality spares, equipment, and machinery. We deliver top-quality products at competitive prices while minimizing logistics costs.

“Your Vessel’s Needs, Within Reach”

Our supply range includes:

WE ARE TRUSTED PARTNERS OF:

- Sunflame
- Kockum Sonics
- Inmarsat
- Polarmarine

MAIN AND AUXILIARY ENGINES

- Bukh Diesel
- Cummins
- Man B&W
- Sulzer
- Volvo Pent
- Yanmar
- Caterpillar
- Steyr Motor
- Himsen
- Mitsubishi
- Others

Pumps

- Azcue
- Desmi
- Iron Pump A/S
- Thune Eureka
- Nash Pump
- Gardner Denver
- Euroflow Pumps
- Wilden
- Kral
- Graco
- Cat Pumps
- Others

COMPRESSORS

- Atlas Copco
- Ingersoll Rand
- Sperre
- Tanabe
- Bauer
- Deno Compressors
- Coltri
- Bock
- Bitzer
- Carrier
- Copeland
- Others

PURIFIERS & FILTERS

- Alfa Laval
- Sondex
- APV Baker
- Tranter
- Vestas Air Coil
- Westfalia

ELECTRIC MOTOR

- ABB
- BEN
- Brook Crompton
- Loher
- Marelli Motori
- Siemens
- Hoyer

HYDRAULICS

- Bosch Rexroth
- Damcos
- Eaton
- Hawe
- Parker
- Vickers
- Staffa
- Hydac Technology
- Olaer/Denison

OTHER

- Boiler spares
- Valves
- Anchors and anchor chains
- Lifeboats
- Lifesaving appliances (LSA)
- Fire fighting appliances (FFA)
- Others

With a global network of trusted suppliers and manufacturers, we guarantee efficiency, reliability, and seamless procurement solutions.

Contact us at
spares@ctsom.com
for your specialist spares supply needs.

“Trusted Marine Motors, Globally Stocked”

CASE STUDY

Dear Piyush,
Good Day

Thank you for your message. We greatly appreciate the strong relationship that has developed over the years between ADNOC and CTS. You are regarded as a valued business partner and one of the first we approach for any urgent requirements. The quality of the products supplied by your team has consistently been genuine, and I cannot recall any instance where the delivered products failed to meet the required standards. We would also like to extend our gratitude to your team for always being accessible and prompt in handling our significant flow of RFQs.

Once again, thank you for your support and services.

Urgent Spares Fulfilment Cuts Downtime Expenses

Overview:

An emergency auxiliary engine breakdown at Fujairah prompted urgent spare parts delivery. CTS responded within an hour, secured immediate order confirmation, and executed onboard delivery – prepped and dispatched by CTS Logistics – within just 8 hours.

Result:

Swift response and delivery minimized downtime and prevented potential delays in the vessel's operational schedule.

STEEL & ALUMINUM

Fabrication, Installation & Repairs

Our teams specializes in high-quality steel and aluminum fabrication, Ensuring durable and reliable solutions, committed to quality and efficiency, we deliver precision-engineered structures on-time and in-situ to minimize downtime and maximize performance.

- Class Approved team for Steel and Aluminum Vessel projects.
- Class Approved team for Pipping Systems/BWTS Installations.

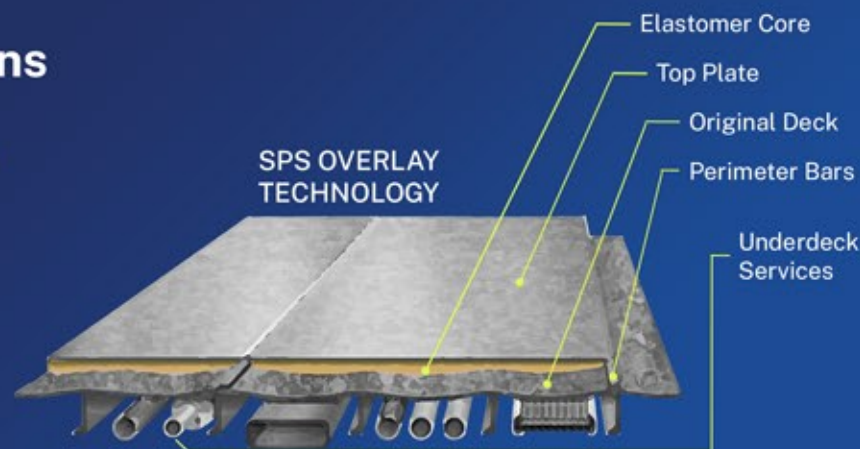

OUR EXPERTISE INCLUDES:

- Renewal of steel in ballast tanks, cargo tanks holds, decks and engine room underwater work
- Repairs to cargo hatch-covers
- Renewal of all types of pipes
- Anchor chain repair
- Renewal of anodes in tanks
- URS 30 hatch-over securing modifications
- SPS Overlay steel renewal
- Others

Hatch Cover Steel Repairs for a dry bulk vessel

Overview:

CTS performed advanced 6GR welding on on a client-assigned bulk carrier, ensuring the structural integrity of the hatch covers for optimal safety and performance. The project involved precision repairs under stringent quality control standards, adhering to industry regulations.

Result:

Successful steel repairs delivered on time, enhancing vessel safety and operational efficiency.

Main Engine/Generators Overhauling and Repairs

Our teams provides comprehensive services for the overhauling and repair of main engines and generators, including:

- Health Check-ups
- 3D Liner Scanning
- Scheduled Maintenance (Top Overhaul/Major Overhaul)
- 24/7 Machinery Breakdown Emergency Support
- Annual Maintenance Packages

Automation and instrumentation Services

We offer expert troubleshooting and repair services for various electrical and instrumentation systems aboard vessels, including:

- Troubleshooting on Engine Control Instruments and Panels
- Troubleshooting/Repair of Navcom, FDS, Ballast Water Control Panels, MSBs
- Custom ECM Performance Tuning

Engine Overhaul and Custom Solution Restore Bulk Carrier

Overview:

CTS handled the overhaul and cylinder head rebuild of the Himsen 5H21/32 engine by addressing tight access, weight restrictions, and custom modifications. A skilled team ensured the efficient execution and seamless integration of the project.

Result:

Custom modifications and careful planning ensured the successful and efficient overhaul and cylinder head rebuild.

Turnkey Engineering Solutions

CTS delivers comprehensive engineering solutions through our experienced team of naval architects, marine engineers, and technical specialists. We provide end-to-end support from concept to completion, with global capabilities and local expertise.

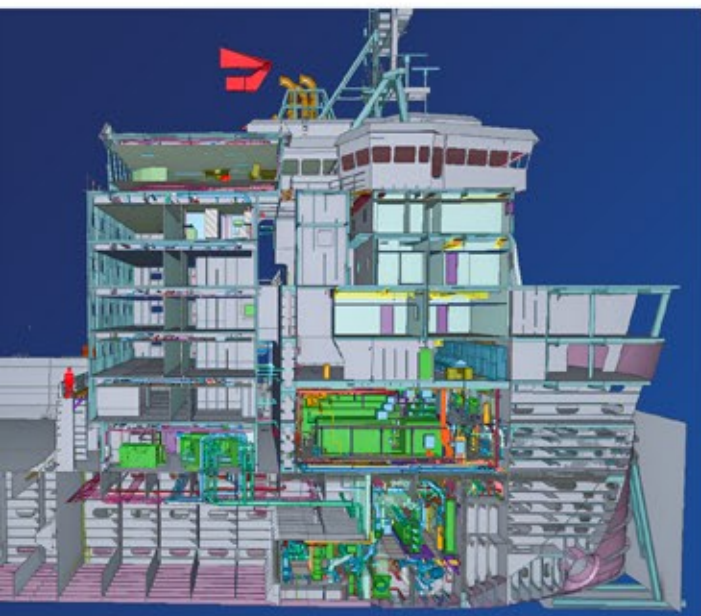

ENGINEERING SERVICES:

- **Retrofit Design Support:** Full turnkey solutions
- **3D Laser Scanning:** Enabling precise engineering
- **Engineering Analysis:** Structural, stability, CFD
- **Naval Architecture:** Class-approved drawings
- **Structural Modifications:** Vessels and offshore systems
- **Pre-Commissioning Support:** Ensuring operational readiness
- **SPM Engineering Support:** Tank calibration, mooring systems
- **Feasibility Studies:** Conversions and system upgrades
- **Regulatory Compliance:** IMO DCS, CII
- and more

Key Benefits:

- **OCIMF Compliance:** Full turnkey solutions
- **OSV & PSV:** High-fidelity engg. inputs
- **Mooring Compliance:** Panama Canal transit and global regulatory alignment
- **Towing Arrangements:** OCIMF regulations
- **Mooring Analysis:** Vessels, barges, PSVs
- **Structural Assessments:** Stability and compliance FEM, and regulatory compliance

Full Turnkey works for BWTS installation in container vessel on-voyage

Overview:

CTS was contacted by a German shipowner for turnkey BWTS installation on a voyage between Europe and the USA. Pre-engineering, fabrication, and onboard works were completed mid-sail to avoid vessel downtime.

Result:

CTS completed all works in 37 days during the voyage, with zero disruption. The client praised CTS's expertise despite the project's intricate nature.

Georg Fischer Piping Systems

CTS is proudly partnered with GF Piping Systems, delivering advanced **non-metal piping solutions** for marine and offshore use. These systems are made from lightweight, **corrosion-free** thermoplastics like PVC-U/C, PE, PP, and PB. They support reliable and safe water, coolant, and sewage transport across ships, wind farms, and offshore platforms.

Key Benefits:

- **Lightweight & Corrosion-Free:**
For the entire service life of the ship (at least 25 years).
- **Class Approved:**
By ABS, Bureau Veritas, ClassNK, CCS, DNV, LR, and RINA.
- **Safe & Hygienic:**
Highly engineered, incrustation-free, and fire-retardant solutions.
- **Sustainable:**
Recyclable materials and compliant with the Green Ship Passport.

Key Applications:

- Ballast systems & ballast water treatment
- Air conditioning & chilled water systems
- Grey & black water discharge
- Scrubber systems
- Seawater cooling
- Technical & fresh water supply
- Chemical dosing systems

Non-Metal. Non-Corrosive. Lower Emissions.

Turnkey installation of thermoplastic piping for onboard water systems

Piping solutions were completed on a newly built vessel, covering pre-fabrication, routing, and installation. Thermoplastics were used for a lightweight, corrosion-resistant system aligned with sustainability and performance goals.

APPLICATIONS: Black & Grey, Potable Hot/Cold water, Chilled water, Jetwater
MATERIALS: SeaDrain (PPFR), INSTAFLEX (PB), ecoFIT (PE)

- Integrated across multiple onboard systems.
- Emphasis on durability, corrosion resistance, and weight reduction.

Line Types Supported

- Potable Hot/Cold Water
- Chilled Water
- Jet Water
- Seawater Cooling
- Condensate Drain
- Galley Drain
- Black & Grey Water
- Sewage Tank
- Bilge and Ballast Systems
- Brine and Water Treatment
- Fire Suppression Systems
- Air Conditioning (HVAC)
- Pools and Spa Areas
- Closed-Loop Scrubber Systems

Thermography & Vibration Analysis

Precision You Can Measure. Problems You Can Prevent.

Enhance operational efficiency, reduce energy consumption, and enable predictive maintenance with our integrated Vibration Monitoring and Infrared Thermography solutions.

Key Benefits

- Early fault detection and isolation
- Real-time monitoring of live equipment
- Root cause analysis and risk reduction
- Predictive maintenance planning
- Up to 40% reduction in downtime
- Up to 25% reduction in maintenance costs
- Enhanced safety and energy efficiency

Know Before It Breaks. Act Before It Fails.

Our thermal and vibration analysis detects early-stage faults, monitors live equipment, and isolates issues before they escalate. From identifying misalignment and bearing wear to faulty electrical connections and circuit overloads, this solution empowers smarter, safer, and more sustainable operations.

Thermography & Vibration Analysis

Detect problems before they turn into repairs. Stay one step ahead of unplanned downtime.

With real-time thermal and vibration data, your systems are always watched — so you don't have to guess.

Extend the life of your most vital systems with smart, predictive diagnostics built for harsh environments.

What it covers:

- Rotating equipment (motors, pumps, compressors)
- Bearings, couplings, and alignment checks
- Electrical panels and switchgear hotspots
- Thermal anomalies in HVAC and piping systems
- Seawater, lube oil, and cooling systems
- Detects misalignment, imbalance, wear, and overloads and more

Decarbonisation

At CTS Offshore and Marine, ***we offer a suite of comprehensive decarbonisation solutions*** to help your fleet achieve carbon neutrality and comply with international standards.

CTS provides hassle free, turnkey engineering and installation. With a global presence and local reach we can ensure competitive solutions that will minimise your downtime whilst fortifying your fleet for the future.

- Free CII Fleet Appraisals
- CII Consulting
- IMO-Aligned Compliance

Decarbonisation

Integrated Emission Reduction Systems

Our decarbonisation solutions are curated by industry experts and installed by qualified CTS professionals. We offer a diverse range of services and technologies designed to enhance energy efficiency and reduce emissions across your fleet.

- Free CII Fleet Appraisals
- 3D Retrofitting Service
- Propeller Inspections / Modifications
- Class-Approved LED Upgrades
- GF+ Piping Weight Reduction
- Marine Absorption Chillers
- Variable Frequency Drives
- Micro Boilers
- Shaft Generators
- Wind Deflectors
- Wind Sail Rotor Installations

**From Assessment to Action:
IMO Ready Decarbonisation**
